Office Action Summary

The disclosure is objected to because of the following informalities: the specification is improper in that it has been submitted on both sides of the paper.

Appropriate correction is required.

Applicant's arguments filed September 12, 1997 have been fully considered but they are not persuasive.

The copy of the substitute specification has not been received.

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 119-121 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 59-74 of copending Application No. 08/018508. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed compositions are encompassed by the compositions of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 11 and 184-186 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 5,639,738.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims encompass the claimed methods wherein the condition to be treated is edema.

Claims 184-186 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear if the claims require a patient to have renal failure, cardiac insufficiency, hypertension and edema at the same time to be treated or can the said conditions be treated separately.

Applicant's arguments filed August 4, 1997 have been fully considered but they are not persuasive insofar as the above rejections relate to the claims.
